

## **Bluefield State College Radiologic Technology Program**

### **Program Goals:**

1. The graduate will function competently as an entry level radiologic technologist.
2. The students and graduates will demonstrate a commitment to professional ethics and behavior.
3. The students will demonstrate appropriate problem solving, communication, and critical thinking skills in the clinical/didactic settings.
4. The student and graduate will understand the importance of values and ethics and life-long learning.
